

HAVE YOU SEEN THE 2025

GOLD Report for Patients With COPD?

The 2025 Global Initiative for Chronic Obstructive Lung Disease (GOLD) Report for patients with COPD includes **the CDC recommendation of Tdap vaccination for all adults not previously vaccinated.**^{1,2}

People with COPD are at higher risk of complications from certain vaccine-preventable diseases, such as pertussis. Getting vaccinated is important to help protect against pertussis.¹

What does this mean for you?

It is important to recommend the Tdap vaccine to your patients with COPD.

**Discuss Tdap
vaccination with
your appropriate
patients today.**

If you don't vaccinate in your office, refer your patients to their local pharmacy or primary care location. Consider eRX to help patients get vaccinated.

Visit **GSKvacciNATION.com/tdap** to learn more about resources relating to Tdap vaccination.

Additional Resources

Learn more about ordering vaccines through your wholesaler or distributor or by visiting **GSKDirect.com**.

To speak to a GSK Representative about vaccines, call **855-893-0014**.

For the GSK Response Center, call **1-888-825-5249**.
